## Gastronomy

### Roger Van Damme

Roger Van Damme prefers to be called pastry chef rather than chef, even though he creates inventive, refreshing new courses, whilst never losing track of the harmony of taste. He possesses a great creative power and has a large background with regards to the newest inventions in kitchen technology. These aspects, now and then complemented by miniscule transfers, result in masterful experiments, in which taste and texture flow together into scrumptious dishes. Through this harmony, unexpected nuances are changed into optimized taste revelries.
